State of Georgia Immunization Program
Georgia Department of Public Health

Vaccine Incident Report

Follow the procedures below when your publicly purchased vaccine has experienced out-of-range storage temperatures. Use a separate report for each affected storage appliance.

1. Do not use or discard the affected vaccine.
2. Isolate the affected vaccine, mark the boxes with an “X,” and post a clear “Do Not Use” sign.
3. If the situation is temporary or quickly remedied (w/in 3 hours), keep the vaccine in its original storage unit with the door closed.
4. If necessary, move the vaccine to a working storage unit or your emergency storage location. Be sure to monitor temperatures at this location.
5. Contact the Vaccine Logistics Associate at 404-657-5013.
6. Record the following information about the incident and submit this form within 24 hours of the incident:

   Facility Name: ____________________________________________ VFC #________

   Telephone #________ Date Reported________ Reported by: ______________________________

   Email Address: __________________________________________

   Storage Unit Involved: ____________________________________________
   (Use a separate report for each affected storage appliance.)
   - When was the incident discovered? Date__________ Time__________ am/pm (circle one)
   - Room Temperature at time of discovery: ________C / F
   - Temperature of storage unit at time of discovery:   Refrigerator_______ C / F   Freezer_______ C / F
     (Record temperature for refrigerator and freezer if a combined unit.)
   - Last known temperature recording prior to incident: Date__________ Time__________ am/pm (circle one)
   - Temperature at last known recording: Refrigerator_______ C or F   Freezer_______ C or F
     (Record temperature for refrigerator and freezer if a combined unit.)
   - Time interval vaccine was exposed to out-of-range temperatures: _____ day’s _____hrs_____ minutes
     (Estimate the worst case scenario based on last recorded temperatures. If using a data logger, use the graphing function to determine the exact interval.)
   - Has the affected vaccine experienced previous temperature excursions? ____Yes _____No

7. Inventory the affected vaccine in columns 1–5 of the Vaccine Inventory Table on page 2 of this form.

8. Contact the manufacturer of the affected vaccine to determine its viability. Use the contact information on page 2. The manufacturer will need the information recorded above to determine vaccine viability. Record the information from the manufacturer in columns 6–8 of the Vaccine Inventory Table
### Vaccine Inventory Table (Copy this page if you need more rows in the table.)

9. If the manufacturer determines the vaccine is viable*: a) Mark the date of this report next to the “X” on the package. This indicates that the vaccine has experienced a temperature excursion and references this report; b) If the expiration date of the vaccine has changed, clearly indicate the new expiration date on the package; and c) Return the vaccine to your inventory. Do not return vaccine to a malfunctioning storage unit until it can reliably maintain vaccine storage temperatures. *VFC will defer to manufacturer guidance regarding vaccine viability. Non-viable vaccine must be returned to McKesson Specialty Care Solutions. Do not dispose of non-viable vaccine except for opened multi-dose vials.

10. If the manufacturer determines that the vaccine is wasted: a) This form will be used to process your vaccine return. A return confirmation letter will be sent to the primary and secondary email addresses on file for your site. b) Account for the vaccine on your Monthly Comprehensive Report.

11. To finish this report, provide the following information: Briefly describe the incident:

____________________________________________________________________________________________________________________________

__________________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________________

What steps will be taken to prevent this from happening in the future?

____________________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________________

____________________________________________________________________________________________________________________________

12. Once completed, e-mail this report to the Vaccine Logistics Associate at dph-gavfc@dph.ga.gov or fax to (404) 657-5736. This report serves as a record of the incident, the steps taken to determine vaccine viability, and the disposition of the affected vaccine. **Keep a copy for your records.**
